Tek-Rail Vinyl Rail Care and Maintenance

How do I clean it?

You can power wash it and use chlorine bleach for stains. Never use a PVC cleaner, as that product is used to melt the PVC for solvent welding.

Commonly Asked Questions

What is Tek-Rail Vinyl made of?

The base ingredient is rigid PVC (Polyvinyl Chloride) modified to provide high impact strength and ultraviolet (UV) resistance.

Will it burn?

PVC has a high flash point, 716 degrees Fahrenheit. It does not readily ignite and does not sustain combustion once the source of ignition is removed. It is therefore categorized as being “self-extinguishing”.

How strong is it?

Tek-Rail Guard Rail systems have been engineered and tested to pass all the Building Code requirements, including IBC and IRC when installed according to Tek-Rail Specifications to a structural base.
